- by far one of the most helpful math TAs i've ever had. he explained concepts so well and had a lot of patience explaining to us concepts when we had trouble understanding. it felt like a vry safe environment to ask questions and I appreciated his advice. definitely created a discussion that was always enjoyable bc he always had good energy and u can tell he genuinely cared about our learning. definitely was a benefit receiving help from khang than just the class alone.
- he was a good TA, provided office hours, and answered any questions I had!
- I really enjoyed having Khang as my TA. He is always super friendly and helpful when answering questions.
- Khang was nice and smart. His sections were enjoyable to attend.
- Overall, this TA made an effort during each discussion session to ensure that everyone understood the material, while also doing so in an entertaining matter, such as making jokes, to make sure people were engaged and learning in class. At the same time, the practice problems he puts on the board are very relevant to the problems and homework we do for class, and so overall was very helpful.
- Thank you for being so helpful and accessible! I sent you many emails throughout the quarter asking for help and you always answered in a timely fashion, thank you for that! Also, thank you for being a great TA! You helped me the most throughout the quarter because I was never afraid to ask you questions that I thought were too simple. Thank you!
